

## Exams Tips for A/L Exam

### Allocate the Most Productive Time of Your Day for Revision

Try to schedule a revision for your most productive times during the day. For example, if you feel fresh and alert in the morning, make sure you do most of your studying earlier in the day. You should also try to:

- Prioritize exams that make up a large percentage of a subject's grade
- Get regular breaks to refresh your mind
- Use a variety of study tools to revise – including books, audio guides and online video summaries
- Highlight important points in your study notes
- Ask family and friends to quiz you on each subject
- Answer past papers so you get a feel for the questions and timing
- Allocate time for relaxation with family & friends
